GASTRIC Health

Supplement for Horses

If GastroMend® doesn't help your horse, your horse doesn't have ulcers!

A NEW APPROACH TO MANAGING GASTRIC ULCERS

Instead of managing pain by decreasing stomach acid production, GastroMend® is designed to promote healing of equine gastric ulcers while maintaining normal digestive functions with stomach acid production. GastroMend® provides the most cost-effective & natural approach to gastric ulcer management in the horse.

GASTRIC Health

Supplement for Horses

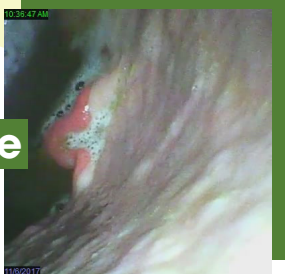

EQUINE GASTRIC ULCER SYNDROME IS ONE OF THE MOST COSTLY DISEASES IN ALL OF THE EQUINE SPECIALTIES.

Not only do gastric ulcers cause pain & discomfort, horses with gastric ulcers tend to eat less & perform poorly. Often, gastric ulcers in the horse are subclinical & go unnoticed for an extended period of time. Horses being treated with gastric ulcer medication commonly still develop gastric ulcers & go undiagnosed. In these cases, horses have poor appetites, poor skin coats, exhibit poor performance & have severe gastric ulcers before they are noticed.

Conventional treatments for gastric ulcers in the horse are aimed at reducing gastric acid production or forming an artificial protective barrier that adheres to the ulcer.

These treatments can be effective at reducing the pain associated with gastric ulcers but do not necessarily promote healing. The primary goal of GastroMend® is to promote healing of the gastric ulcers & improve the mucus layer so the horse's stomach can function normally & pain free.

Before

GastroMend®
RESOLVE | RECOVER | RESTORE

- Heals & Prevents Equine Ulcers
- Gastric & Hindgut Health for Optimum Nutrient Absorption
- Helps Maintain Healthy Appetite
- Premium Nutritional Supplement
- All Natural & Cost Effective
- No Prescription Needed
- Maintains Optimum Digestive Health
- Supports Total Equine Gut Health
- Easy to Administer
- Increases Collagen Production

How Does GastroMend® Help Equine Gastric Ulcer Management?

GastroMend is formulated with high quality natural ingredients that have been proven to promote healing & prevent gastric ulcers. Specifically, naturally derived pentacyclic triterpenoids promote gastric ulcer healing by increasing collagen and fibronectin production. Collagen & fibronectin are critical components how the basement membrane & of the healing process. The natural components of GastroMend® have also been shown to improve the quality of the mucous layer in the stomach & prevent gastric ulcers in challenge studies.

Why should you supplement with GastroMend®?

We believe GastroMend® is the most effective equine gastric ulcer supplement on the market, period. It is palatable, simple to use and inexpensive. Take Equine Gastric Ulcer Syndrome out of the equation so your horses can have improved appetites, better hair coats & body condition, & optimum nutrient absorption. We guarantee your complete satisfaction.
